

SOLAR COLLECTOR FOR SWIMMING POOL TEMPERATURE

CHARACTERISTICS

- **Warranty:** 15 years.
- **Pool Heater Material:** EPDM- Ethylene Propylene Diene Monomer, ABS Acrylonitrile-Butadiene-Styrene
- Major Energy Production Specific
- There is no risk of overheating of the pool.
- It has large area of solar energy absorption.
- Pigmentado resistant to ultra violet rays.
- Lightweight, flexible, easy to demonstrate and install.
- Project to work with high flows.
- High resistance to pressure (Up to 0.2 Bar=2.90 PSI).
- Zero maintenance.

Measures	A	B	Φ
	1.33 m	3 m	6-8 mm
